Feeding back Capacity Building
Expertise and Experiences

immediate 2014 outputs

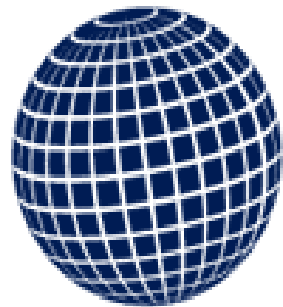

- capacity gap analysis
- first draft model for use in strategy and policy planning
- portal to help connect people with capacity debates, expertise and opportunity
- recommendations for priority activities in 2014 – focused on increasing scale, pace and quality of cybersecurity capacity

working with us...

Global
Cyber Security
Capacity Centre

- contribute to the activity of our working groups
 - help ensure inclusivity
- provide us with case studies
- allow us to assist you in capacity building and learn directly from your experiences
- connect us to capacity-builders in your region
