I consider it an enormous privilege to send this message to members and other stakeholders as Chairman of the Commonwealth Telecommunications Organisation (CTO). During the 2012-13 operational year, the CTO registered strong growth and, more importantly, was able to position itself at the centre of the Commonwealth's ICT agenda.

Driven by its six priority areas, Mobile Broadband, Cybersecurity and Cybercrime, ICTs for People with Disabilities, Regulatory Environments, ICTs in Education and Youth and ICTs, the Organisation has become a key contributor to the Commonwealth's efforts to leverage ICTs for development.

I am very pleased with the fact that the Organisation has found creative ways, in addition to its traditional operational areas, to become a key player in the global ICT arena. Today, the Organisation is at the centre of a number of activities on a global scale, particularly cybersecurity and ICTs for disabilities, that will bring practical benefits to members and non-members alike.

It is encouraging to note the expansion of the membership network of the CTO during the year. Today the membership network of the CTO extends from industry giants such as BT and Microsoft, to British Overseas Territories such as Montserrat. This extensive and diverse network readily lends itself to the exchange of expertise and technology between members and the development of multi-stakeholder partnerships, in a way that benefits both the less-endowed and the well-endowed.

I am very hopeful that soon we will be joined by the few Commonwealth countries that are not yet Full Member Countries, so that the CTO truly reflects the scale and diversity of the Commonwealth.

A man in a grey suit and dark tie is speaking into a microphone. He is standing and addressing an audience. In the foreground, the backs of two men's heads are visible; one is wearing a blue shirt and the other a white shirt. The setting appears to be a conference or meeting room.

It is pleasing to note a new sense of purpose and focused dynamism, driven by the 2012-16 Strategic Plan. I commend Professor Unwin for his Strategic Plan, which has brought about a fundamental change in the way members and the Secretariat work together towards a common goal, and I commend all the staff of the Secretariat for the committed and enthusiastic manner in which they have implemented the plan.

Finally, on behalf of the Government and the people of Kenya, I thank all the members for the honour bestowed on our country by electing someone from Kenya as the chairperson of this august body. I hope Kenya was able to meet the expectations. We look forward to another year of success at the CTO.

Juma Kandie
Chairman, CTO

“Our conferences and events have also been a considerable success, and providing invigorating opportunities for members and others to meet together...”

This has been the first full year of the CTO's current strategic plan, which has given new vision and direction to the Organisation. Membership lies at the heart of the CTO, and I am delighted that so many of our members, old and new, have engaged actively in the new direction in which the Organisation is heading.

Managers and staff at the Secretariat have also worked tirelessly to support members in implementing their ambitious programmes to use ICTs effectively to contribute to development across the Commonwealth, and I am very grateful indeed to be working with such a dedicated and professional team.

Much of my own time over the last year has been spent in getting to know the needs of our many members, often through all-too-brief visits to their countries, and in encouraging new members to join.

I have sought to spend time in many different parts of the Commonwealth really getting to know how our operational divisions can deliver support and value-for-money services to the many exciting initiatives that are ongoing in every continent, and I am incredibly grateful to the time that ministers and senior government officials, as well as leaders of global corporations, have spent sharing with me some of their ambitions and challenges. Together, we must develop collaborative initiatives that can really benefit all of our citizens.

The value that the CTO can bring has been clearly recognised by our new ICT sector members, especially from the private sector, and I look forward to seeing much closer multi-stakeholder collaboration resulting from this in the years ahead.

Alongside the work of our operational divisions in serving the diverse requirements of our members, the 2012-16 Strategic Plan draws attention to the need for the CTO to concentrate on doing a few things really well. Hence, over the next three years we are addressing six main priority areas: Mobile Broadband, Cybersecurity and Cybercrime, ICTs for People with Disabilities, Regulatory Environments, ICTs in Education, and Youth and ICTs.

As the oldest, largest, and I hope most vibrant ICT organisation in the Commonwealth, we have a responsibility to take a real leadership role in helping to reduce the duplication and overlap of efforts, so as to ensure that the best use is made of limited resources in delivering effective action. I am grateful to the very many people and organisations that have offered to walk this path with us. Together we can make a real difference to the lives of poor and marginalised people and communities across the Commonwealth.

Tim Unwin

Professor Tim Unwin
Secretary-General

About the CTO

Who we are

The CTO is the oldest and largest Commonwealth organisation engaged in multilateral collaboration in the field of information and communication technologies (ICTs). Using its experience and expertise, the CTO supports members in integrating ICTs to deliver effective development interventions that emancipate, enrich, equalise and empower people within the Commonwealth and beyond.

What we do

The work of the CTO goes back to the Organisation's creation in 1901 as the Pacific Cable Board. Since then, the CTO has been at the centre of continuous and extensive international communications development funding, co-operation and assistance programmes. Since 1985, the organisation has delivered to its recipient members in Europe, the Caribbean, the Americas, Africa and Asia-Pacific over 3,700 bilateral and multilateral telecommunications and ICT capacity building projects in the form of policy, operational and regulatory training, and expert assistance. Moreover, the CTO has been at the forefront of generating cutting-edge knowledge through its research and consultancy services, as well as sharing knowledge through its conferences and workshops held across the world. This long history as a development facilitator provides the Organisation with a unique and growing delivery capacity for ICT for Development (ICT4D) programmes and services. Recently, the CTO has significantly reviewed its mandate to reflect and respond to today's global development challenge as set out in the United Nations Millennium Development Goals (MDGs).

Our Mission

To promote, facilitate and guide members in using ICTs to deliver effective development interventions.

Our Vision

To be the preferred partner organisation for governments, the private sector and civil society in delivering effective ICTs for development in the Commonwealth and beyond.

The CTO seeks to work collaboratively with other Commonwealth bodies to build mutually beneficial synergies in the interests of its members. The CTO has a key role to play in leading ICT4D initiatives across the Commonwealth, and it is committed to working together with other Commonwealth entities to reduce overlap and replication of activities. The CTO welcomes the opportunity to offer Secretariat support to any Commonwealth ICT initiatives that reflect the needs and interests of its members.

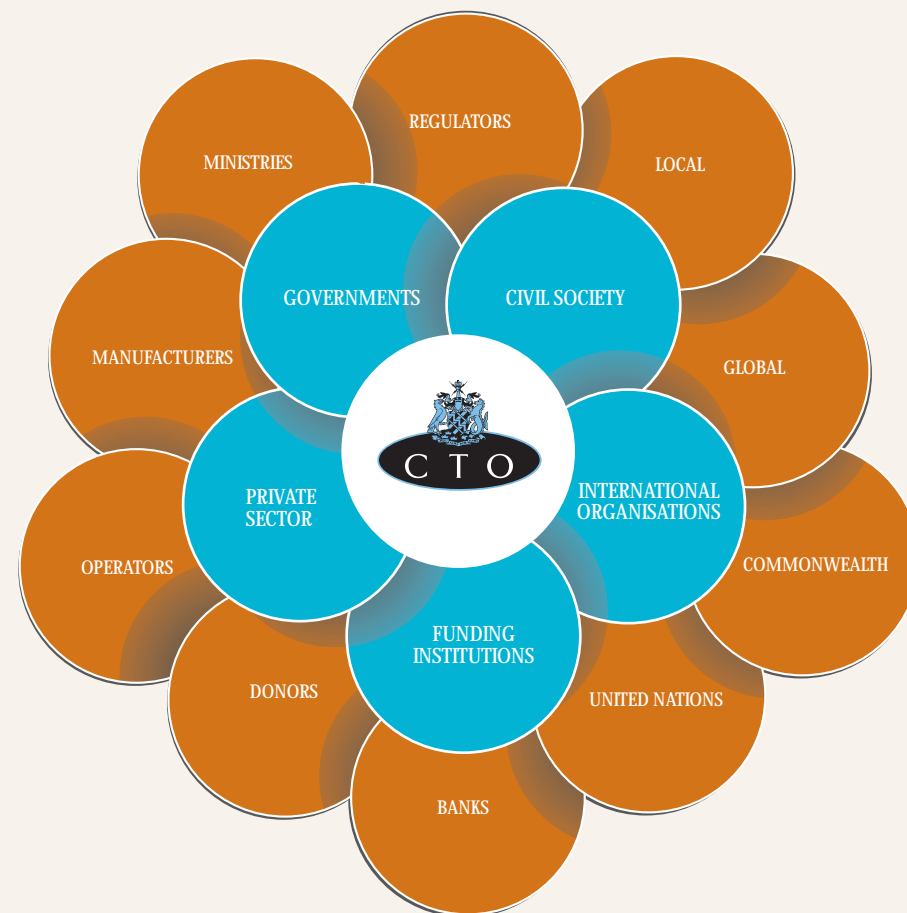

Membership - At the Heart of Everything We Do

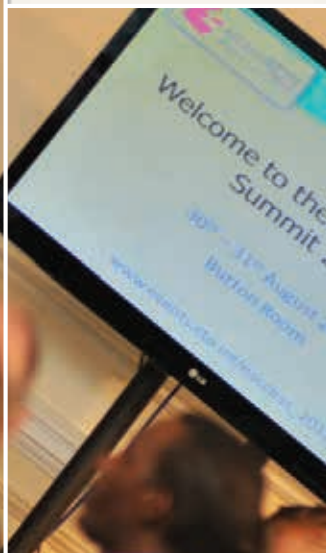

The CTO's programmes and activities are driven by its members' interests and priorities. In order to deliver real and practical value to our members, our 2012-16 Strategic Plan focuses on five main outputs:

1. Vibrant membership committed to the CTO's vision;
2. Enhanced ICT4D capacity development among members;
3. More effective multi-stakeholder ICT4D partnerships operating in Commonwealth countries;
4. Greater engagement by the private sector in ICT4D initiatives in Commonwealth countries;
5. The CTO being a thought-leader in six priority areas of expertise:
 - > Broadband, particularly Mobile Broadband;
 - > Cybersecurity and Cybercrime;
 - > ICTs for People with Disabilities;
 - > Regulatory Environments, including convergence and digital broadcasting switchover;
 - > ICTs for Education;
 - > Youth and ICTs.

The CTO offers many benefits to its members, including:

- > Building and expanding relationships, showcasing countries and raising their profile through the membership network;
- > Participating in the CTO Council meeting and the Forum, the main conference of the CTO held annually, hosted by a member country and attended by senior policymakers, heads of regulatory authorities and high level decision-makers from the private sector;
- > Playing a role in the governance of the Organisation by election to the CTO's Executive Committee;
- > Participating at CTO conferences on topical subjects, as speakers, exhibitors and delegates;
- > Organising, through the CTO, and attending tailored forums for high level decision makers;
- > Receiving and providing training to build capacity in a wide range of subjects in ICTs;
- > Accessing cutting-edge research, information, toolkits, models and templates.

CTO Ambassadors

The role of CTO Ambassadors is to strengthen the Organisation's stakeholder engagement in different regions of the world. They are distinguished individuals in the field of ICTs for Development, who possess significant experience at a senior level in the public, private or civil society sectors. Through their engagement with wide networks of decision-makers and thought leaders they help ensure that the CTO is informed about, and contributes to, ICT initiatives in their regions.

The main activities of CTO Ambassadors include:

- > Helping the CTO expand and deepen its network within and beyond the Commonwealth;
- > Promoting the CTO's relationships with relevant stakeholders;
- > Assisting in forming multi-stakeholder partnerships to be brokered by the CTO;
- > Representing the CTO at meetings, conferences, seminars and workshops;
- > Acting as the CTO's liaison point with relevant multilateral and bilateral agencies in their regions;
- > Sharing information about the CTO with relevant stakeholders;
- > Contributing to the CTO's knowledge base about ICTs.

MoU Partners

To enable it to implement its mission and mandate, the CTO has established a range of collaborative links with the following organisations that have a complementary mandate, through Memorandums of Understanding (MoUs).

African Forum for Utility Regulators	International Telecommunications Satellite Organisation
African Telecommunications Union	International Telecommunication Union
AfriNIC	Internet Corporation for Assigned Names and Numbers
Asia Pacific Telecommunity	Organisation of Caribbean Utility Regulators
Caribbean Association of National Telecommunications Organizations	Pacific Islands Telecommunications Association
Caribbean Telecommunications Union	Southern Africa Telecommunications Association
Commonwealth of Learning	Sri Lanka Association of Software and Service Companies
Commonwealth Parliamentary Association	Telecom Equipment and Services Export Promotion Council
Communications Regulators' Association of Southern Africa	United Nations Conference on Trade and Development
Comnet	West Africa Telecommunications Regulators Assembly
East African Communications Organisation	World Information Technology and Services Alliance
Global Alliance for Information and Communication Technologies and Development	
International Cybersecurity Protection Alliance	
International Multilateral Partnership Against Cyber Threats	

Strengthening Capacity in Network Technology and Management

During 2012-13, CTO's Capacity Development & Training division (CDT) continued to address the skills development needs of members and clients within the Commonwealth and beyond. The division responded to requirements from 20 countries on a range of topics, reaching over 560 ICT professionals in the Caribbean, Africa and Asia-Pacific. Almost 70 per cent of CDT-led programmes focused on technology and management courses, helping to address members' needs in one or more of the CTO's strategic priority areas. In addition, out of a total of 34 courses and consultancy projects organised during 2012-13, nearly 50 per cent addressed one or more of the CTO's strategic priority areas, e.g. Mobile Broadband, Cybersecurity and Cybercrime or Regulatory Environments. Most CDT courses and consultancy projects were organised within the Programme for Development & Training (PDT), CDT's main assistance programme. Once again, PDT members have benefitted from the unique pooled procurement facility the programme offers.

CTO's international events provide a fine balance between networking, sharing knowledge and influencing policy. They are designed to reflect the organisation's six priority areas, as well as generic topics within the ICT sector. These events are often organised in conjunction with our members, including governments and regulatory authorities. They take place in all countries of the Commonwealth, across Africa, Europe, the Americas, Asia and the Pacific region.

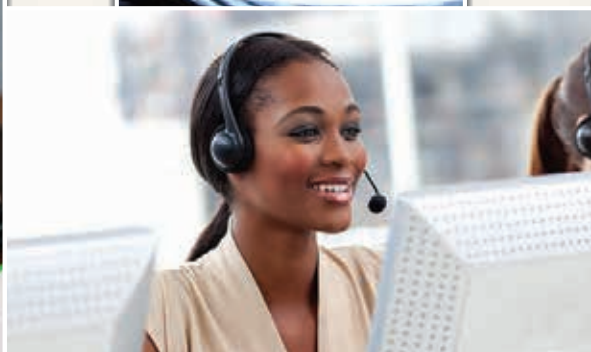

As well as one-off events and those that we convene in partnership with other organisations, the CTO runs six annual events every year which bring together heads of government departments and regulatory authorities as well as senior decision-makers from global private sector companies and civil society organisations. Most of the events run by the CTO have been held annually for more than five years. They offer a unique opportunity for both public and private sector stakeholders to discover how the right partnerships can hasten ICT developments for the benefit of all, including the marginalised across the world.

The CTO's Research & Consultancy (R&C) division undertakes research and consultancy for CTO members and non-members. In recent years, the division has become an invaluable resource for a wide range of stakeholders, including multilateral and bilateral development partners, ICT operating companies, ICT ministries and regulators, civil society organisations and various industry associations. Through its various activities, the division enables stakeholders to answer critical questions about the development of ICTs in the Commonwealth and beyond, their impact on socio-economic development, and future trends in the usage of ICTs. R&C meets stakeholders' needs by delivering reports, data sets and presentations on a range of topics, such as ICT policy and regulatory development, institutional capacity building, business analysis and improved stakeholder engagement. In doing so, the division has enabled stakeholders to gain a wider understanding of the ICT-driven world they live in, and to adapt to it in order to meet their institutional, business and socio-economic development objectives.

The project was launched in June 2012 and the CTO delivered the final reports to the NCC in December 2012. The outcomes of the survey are publicly available on the NCC's website at www.ncc.gov.ng.

e-Accessibility Summit 2012

The first ever e-Accessibility summit of the CTO was held in London on 30 - 31 August 2012 with the support of the UK Department for Culture, Media and Sport. The event brought together Ministers, senior officials and regulators in the ICT sector with representatives of disability councils of Ghana, Gibraltar, Jersey, Kenya, Malawi, Mauritius, South Africa, Sri Lanka, Trinidad and Tobago, the UK and Zambia. The event highlighted the importance of ICTs for people with disabilities and concluded with the following eight-point agreement:

1. The inclusion of e-inclusion on the CHOGM agenda;
2. Policies and practices to allow people with disabilities to have equal access to ICTs and accessible information, without having to pay a premium for it;
3. An e-inclusion champion in every Commonwealth country;
4. An e-inclusion policy in every Commonwealth country;
5. The sharing of examples of existing good practice in the Commonwealth and beyond;
6. Government and business use of ICT procurement to encourage inclusive design;
7. The Accessible Technology Charter; and
8. Effective training programmes on e-inclusion for governments, the private sector and civil society.

Diploma in Telecommunications Management (DTMS)

The DTMS is an intensive six-week programme that provides a thorough understanding of all aspects of telecommunications business management. Relevant to both technical and non-technical ICT professionals, the course includes a combination of lectures and group exercises to explain key areas of ICTs, including fixed and wireless communications networks, policy and regulation, business strategy, project management, human resource management, marketing and customer relations management, business continuity planning, and financial management. During 2012-13 two DTMS courses were held, in Africa (South Africa) and the Pacific region (Papua New Guinea), with delegates coming from over 20 organisations.
